## PROFILE

I'm a Software Developer with +4 years of experience, my technology specialist in C# .NET and NodeJs. I have experience with pharmaceuticals systems, insurers systems and retail systems. Curious, thirsty for knowledge and self-taught to gain knowledge. Always learning and modernizing and further develop my skills. I would like to join a highly productive team, support/develop people and companies, support/help with good work.

## CAREER HISTORY

I have started to work as a Software Developer like an internal ship when I was 18 years old, I worked on Tabmedia and I built project to create to offers of medicines.

What the project has done? When the salesman makes a presentation to doctor via Tablet using the Tabmedia platform, the app has developed to get the data in real-time and company is know if the doctor has liked the medicines showed and the company could know before the medicine manufacturing what is the chance the doctor to prescribe the medicine to the patient.

The first year the company has contracted the Tabmedia app, the company has saved around R\$ 1.000.000,00 (one million reais) € 202.750 (two hundred two thousand and seven hundred fifty euros). I worked on Tabmedia for 2 years and 4 months.

On Verity IT, I worked on three projects, their name were Carrefour, Sulamerica Insurance and Axa Insurance.

**Carrefour Verity's Customer:** is a big supermarket in Brazil and I worked on the Development Team and Support Team, I worked on a project and I have had direct customer contacts to get information about new tasks and features developer.

**Sulamerica Insurance Verity's Customer:** is a company in Brazil that I worked on a project to get customers information on Sulamerica website, the platform create a template email and has sent the insurance offers and welcome letter from customer email.

**Axa Insurance Verity's Customer:** is a company in Brazil that I worked on a project to make financial control from the customer, how much costs the insurance, how much the customer needs to pay when the next customer insurance expired and how the type of insurance could I offer to next time?

I worked on Verity IT for 11 months and I got an opportunity on CBYK Consultoria and there I worked on two projects Centauro and Rihappy

**Centauro CBYK's Customer:** is a sports store from Brazil and it has been in the market since 1981. Centauro has 190 shops in 23 cities all over Brazil. I worked on Medium level with more 3 developers to create a web system for clothes sales.

**Ri Happy Brinquedos CBYK's Customer:** is the biggest toy store in Brazil since 1988 and the leader in its industry.

Development of a system for data control integrated with Linx OMS via RESTful APIs; exports of report and creation of SAC model to help employees to access the orders easily and to have better decision making through this feature.

I have been working with Software Developer in Ireland, in a company that the project to help Latin American student to buy an English course, the student could buy the English school and travel to Ireland without a problem.

## EDUCATION & TRAINING

Bachelor's Degree in Information System's

Universidade Paulista - UNIP

12/12/2018

## IT SKILLS & LANGUAGES

- C#, .NET Standard, .NET Core, MVC, Web APIs, Web Services, JSON and XML, ORMs (Entity Framework, NHibernate, Micro ORM like Dapper), ADO .NET, Razor, Views, Partial Views and I have known NodeJS, databases and Front End technologies.
- JQuery, Promises Functions, Ajax, Html5, Bootstrap and CSS3, Json (JavaScript Object Notation) and XML;
- SQL Server, MySQL, Oracle and MongoDB;
- GIT, TFS;
- CI/CD pipelines, Scrum, Kanban
